Lodgesons R200 Wireless Keypad Controls

Our multi-function R200 systems enable you to safely steer the car whilst operating the secondary functions (e.g. indicators and wipers) with just one hand. Simply pressing a button activates the required function.

The keypad will control the functions in the same way as your car's own controls and therefore functions may vary slightly from car to car and to those listed below.

Which functions can I have?

What the industry is saying...

"The Lodgesons R200 range offer an unrivalled quality of product combined with good technical support. This is why we choose only to offer the Lodgesons wireless keypad controls on our installations."

Helen Alston, Director, Jeff Gosling Hand Controls - The UK's leading manufacturer of driving adaptations

"Why do I use them? It's simple. In my opinion they are the total solution to operating secondary controls while driving with one hand out of physical necessity; ergonomic and easy to use even when driving long distance, I have never had the system let me down."

Haydn Jenkins, ADI, Alpha Automatic Specialist Driving Tuition

"JDHC has developed an unrivalled reputation for designing and installing the highest quality adaptations in the industry. We can only maintain such high standards by always fitting the best equipment on the market. That is why we have been fitting Lodgesons devices for over 20 years. Their devices guarantee quality and reliability, which is great for us. They also deliver smart, ergonomic aesthetics which is great for our customers."
